

STATEMENT OF DUE DILIGENCE

I, _____ (print name)

am fully aware that safe and correct procedures are an important and integral part of the laboratory component of research, and I have read and understood the material safety data sheets and its corresponding safety protocols related to the project entitled

I understand that it is my responsibility to:

1. conduct myself and all those working in the lab in a safe manner,
2. be aware of all hazards due to my project and inform the biological and chemical safety committee and people working on the project about them.

I understand that any safety infractions committed by myself and/or any students/researchers working in the laboratory as determined by the safety officer of the university and/or the biological and chemical safety committee may result to the termination of the project.
